Facility Management Service assisted with ICD System,
digital ecosystem, to integrate all business
process in contented our customer
satisfaction to the fullest.

THE INITIATOR

PT INDO CIPTA DAYA with RENNO INDONESIA that stands for creative people, innovative solutions are here to bring the concept of integrated building maintenance facility management by implementing technological advances. The goal is to be more straightforward process of monitoring work and valid data for customers in determining the allocation of better budget usage from time to time.

RENNO INDONESIA also has a mission to be one of the pioneers in implementing green cleaning, that is environmentally friendly and safe for customers and RENNO agents.

The foundation for establishing PT INDO CIPTA DAYA was the initiation from me, ALVIN BAHAR, who previously had experience in cleaning services for approximately 15 years with his last position as Director of Operations. Currently, PT INDO CIPTA DAYA is registered as an active member of ISSA (International Sanitary Supply Association), a leading trade association for the cleaning industry worldwide with more than 7,000, with member number 514102.

Hopefully, with the presence of PT INDO CIPTA DAYA with the brand RENNO INDONESIA, it can be well received by the Indonesian market and contribute to opening up job opportunities and improving the welfare of the Indonesian people.

Thank You

Alvin Bahar

Initiator

OUR HISTORY

With the support of great people within our management that had having more than 15 years of working experiences in facility management and also cleaning services provider as well as strategic marketing consultant, we surely ready to face the world where everything is depend on digital and automation system, just like how we currently developing our own integrated system.

It all started where the commitment begins to not sets some limit for our work just to be labelled as a working hard facility management vendor, as we would also like to be recognized as solid teamwork, the one that is not working in silos anymore. We're working with the helicopter point of view and efficiently assist by our very own ICD Smart Integrated System; we would like to quickly identify the problem and minimize the possibilities of wasted time and cost.

VISION

To become one of the largest companies in Indonesia that can participate in helping improve the quality of life for people and the environment on a global scale.

MISSION

Provide creative and innovative solutions for:

- Customers to improve the effectiveness of property and labour asset management
- Committed to assisting employees in developing their skills and potential

ICD

Smart-Integrated System

RENNO INDONESIA is specially developing a digital ecosystem called ICD Smart Integrated System to help us building more efficient environment, covering 3 main functions:

Agile Recruitment System

Controllable Project Management

Smart Head Quarters

CORE SERVICES

COMMERCIAL BUSINESS

RENNO CLEAN

Cleaning services that come along to ensure that the environment within the property covering both accessories and facilities is not only clean but also well-maintained.

RENNO CLEAN PRO

Specialized for areas that require a higher level of hygiene quality, such as clinics and hospitals, pharmacy industrial factories, consumer goods factories and international schools.

RENNO CO-WORKER

Providing well-trained manpower in accordance with the client requests for receptionist, customer service, doormen, and other queries.

SUPPORTING SERVICES

COMMERCIAL BUSINESS

RENNO HIGH RISE CLEANING

Cleaning service with main goal to maintaining on high and difficult to reach areas in the commercial building as well as luxury property.

RENNO PEST MANAGEMENT

Pest control services to handle such as rats, mosquitoes, ants, termites, cockroaches, snakes, and others related problem by using eco-friendly chemicals.

RENNO GREEN

Assist you to maintain any things related to the gardening services, including plants and herbs that are inside with the aim of maintaining the aesthetic beauty of the garden itself.

For individual customers, we also provide Renno Home Care, with range of services :

Disinfectant
Services

Deep Cleaning
Services

Thermal
Sanitization

Stone Care
Cleaning

Bed & Carpet
Cleaning

Hydro-Vacuum

RENNO DISINFECTANT

Services that aim to destroy or inactivate both the bacteria and viruses on hard, nonporous surfaces by using spraying method according to GBAC standard procedure.

RENNO DEEP CLEANING

Deep cleaning is a service that provides more detailed and intense cleaning, with 2 major aims: cleaning all surfaces that can't be reached by regular cleaning and kills bacteria on all surfaces.

RENNO THERMAL SANITIZATION

Sanitary services that use the hot steam method with the aim of killing bacteria and microorganisms on the surface. The advantage of this method is chemical-free so it is safe for all kinds of surfaces. Suitable for kitchen and pantry area at hotel, restaurant, and café.

RENNO STONE CARE

Natural stone maintenance and repair services (marble, granite, terrazzo, onyx, paras jogja, paliman and others) using eco-friendly technology and method. The services applied for all type of client both in commercial building and personal luxury property.

BED & CARPET CLEANING

Services that mainly handle bed & carpet cleanliness include removing all dust mites, their excrement, and any other debris that may have accumulated, such as dead skin and hair. We neutralize any dust mites that might re-infest and applying an anti-allergen to keep dust mites away for a considerable time.

RENNO HYDRO-VACUUM

The dust particle separation service is chemical-free because it is also equipped with dual separator technology causes higher turbulence in the air so that dust particles are absorbed more quickly. So, it's safe for your environment. It is suitable for cleaning mattresses, sofas, carpets, curtains from dust & allergy-causing mites.
