# WHERE DOES IT HURT?

1. NECK
2. SHOULDER
3. ELBOW
4. WRIST
5. BACK
6. KNEE
7. HIP
8. ANKLE

Whether you've had a recent sports injury or you've been suffering for a long time with back pain, neck pain, herniated discs, bulging discs, knee & hip pain; or have been told that surgery is your only option, that's all about to change.

At New York Pain Care we do things differently - our individualized, patient centered approach to care ensures that you get the right diagnosis from the right doctors and that your treatment starts as soon as possible to get you better faster.

With locations in Midtown, Union Square & New City, early and late office hours, as well as easy online appointments; starting you on the road to recovery with our Top Rated Board Certified Doctors is quick and easy.

## SPINE AND BACK CONDITIONS

At New York Pain Care, our team of Back Pain Specialists and Spine Specialists pride themselves in taking a unique approach to diagnosing and treating back pain using Non-Surgical Treatments.

## SHOULDER CONDITIONS

If you are experiencing shoulder pain, you are not alone. Shoulder pain is a very common complaint and can be caused by the shoulder joints, shoulder tendons and muscles, shoulder injuries, or a combination of all of the above.

## ELBOW, HAND & WRIST CONDITIONS

Common problem areas for people of all ages and professions are the elbow, hand and wrist. They can also severely impact your ability to complete daily tasks and affect your ability to work.

# CONDITIONS

# KNEE CONDITIONS

Knee pain is a common problem among people of all ages. Knee pain can be due to a sports injury, a work-related injury, or an existing medical condition. The knee is comprised of many intricate parts including cartilage, bone, tendons, ligaments, and fluid. The injury or irritation of even one can lead to relentless pain and even limit physical activity.
