Fixing Details

→ General Information

Most of the Traffic Signs in this catalogue can be fabricated from different materials as follows;

Self adhesive reflective sheeting or P.V.C. applied by special application equipment on Aluminum or Galvanized Iron or Plywood sheets. As per our client request considering the lifetime required for the Sign to be use.

Also mild steel angle frame sign holder can be fabricated to suit the sizes of temporary signs. And direct delivery to the working sites as saving contractor time.

All warning signs are available from choice of the following materials;

A. Self adhesive vinyl, good for internal use and easy to appl to any clean dry smooth and grease proof surface.

B. Rigid plastic or P.V.C. 2 or 3 mm thick can be fixed to any solid base metal, concrete or wood using screws, pop rivets or nails.

The colors and symbols used are designed to confirm to American, European and G.C.C. Standards and specifications.
